PROJECT EXPERIENCE

Cisco Commerce Workspace	San Jose, CA
Role: <i>Software Engineer</i>	Duration: 2 years

- Developed both frontend UI code in JavaScript frameworks – Angular JS and Angular 10 and backend in Java Spring boot and REST API. Also, I wrote test cases using Junit 4 and Junit 5.
- Lead the Unit testing team and solved the doubts and queries in test codes. Fixed the vulnerabilities and bugs from the SonarQube and maintained the code from security attack using Checkmarks and rapid7 tools.
- Worked on code deployment using OpenShift, IBM's uDeploy & uRelease tool and spinnaker CI/CD and Monitored Cloud Application issues for different environments.

Switcher B2B	Atlanta, Georgia
Role: <i>WooCommerce Developer</i>	Duration: 8 months

- Developed the whole website using WordPress, Custom Plugins, and enhanced themes from scratch.
- Designed custom product pages, cart & checkout pages, and other static pages. Also designed a carousel and animations with Elementor and WP Bakery page builder. Also written custom code for enhancement.
- Managed WPML translation in multiple languages, designed separate pages for all translated languages, uploaded the products and managed the product catalogue.

Tayana Solutions - Business Site	Atlanta, Georgia
Role: <i>Front-end developer</i>	Duration: 2 months

- Designed the website and its custom pages, blog posts, vector images, banners, carousels, product pictures, forms, and login pages and integrated with third-party websites.
- Worked with multiple teams like development, UI design, Product management, and Data Analysis and understood Business requirements directly from the client. Helped to enhance the website performance.
